

Satellite Broadcast Service (SBS)

A satellite distribution service offering end-to-end solutions for Video Broadcasters, including design and installation of earth stations for Uplink, Downlink & Occasional use services for Television channels

Empowering Corporate Networks

Supernet, an award winning service provider, is a wholly owned subsidiary of Telecard Limited, a licensed domestic and international long distance operator. Supernet is a pioneer in the field of providing integrated data connectivity solutions for the corporate entities, and offers a one-window operation for all corporate communication needs.

Supernet has an extensive nationwide network, an experienced team and an excellent track record of delivering

world-class service.

Supernet has a long list of satisfied customers from various sectors which include Airlines and Transportation, Banking, United Nations Organizations, Cellular Service Providers, Government Departments, Manufacturing Industries, Logistics Companies, Construction, Mining, Education, broadcasters and Oil & Gas.

- Over seventeen years of experience in deploying similar networks
- One source for fully integrated local to global communications needs
- Operational flexibility for affordable, reliable and efficient solutions
- Solid international partnerships

- Consistent Network with built in redundancy
- 24 x 7 x 365 redundant Network Operations Center (NOC)
- Nationwide footprint for providing fast services
- Multiple Service Flow capability i.e., the same link can support different applications
- Unsurpassed reliability backed up by industry leading Service Level Agreements (SLAs)

Supernet offers a wide range of broadcasting services to suit the business needs of the video broadcast customers. These solutions can be tailored to meet the specific requirements of the broadcasters for providing quality turnkey solution in a cost effective manner, adding value through maintaining high client service standards and building on many years of satellite expertise and network design experience.

SERVICE FEATURES

Satellite Bandwidth

Supernet offers satellite capacity in the C-band and Ku-band that covers both regional and international markets. The capacity is available for occasional-use or full-time use.

TV Uplinking Solution

Supernet offers earth station solutions in collaboration with multiple high-quality vendors in order to satisfy the needs of the TV Broadcasting community.

Solution includes provision, installation and maintenance of:

- * Video uplinking Antenna systems
- * RFT/BUC
- * Video Encoders
- * Video Modulators/Demodulators
- * DSNG solutions

Engineering Services

Supernet offers a broad array of professional services that allow the customer to take advantage of the expertise in various areas of satellite operations. Our services provide you with opportunities to expand your business offerings to your customers without having to make large up-front investments in new staff or facilities.

Support & Maintenance

Supernet maintenance philosophy hinges on the fact that preventive maintenance is always better than corrective maintenance.

Our engineers are well trained and equipped to ensure proper installation and maintenance of earth stations, Transmission and DSNG setup. DSNG

engineers are readily available on hire for live event coverage, news application and other broadcasting needs throughout the region. Supernet can also provide manned services to manage routine operations on 24 x 7 x 365 basis.

Support & Maintenance services include:

- * Installation and commissioning
- * Support and coordination for faulty equipment
- * Maintenance, moves and site changes
- * Re-point and system upgrades
- * Disaster recovery
- * Technical expertise
- * Monitoring and control of remote sites
- * 24 x 7 x 365 customer service & support
- * Expert engineering team with years of experience in designing similar networks
- * Antenna Testing
- * Spare Management
